

CA305 – Preliminary Continuous Assessment Assignment – PPARS Analysis

Note: As explained, the purpose of this short assignment was to enable students to become familiar with some of the important issues in software project management through study of the well-known PPARS case.

The total mark for the assignment was just 4% of the total module mark. Everyone who participated made a good, if not quite a perfect attempt. It seems invidious to distinguish between attempts so that **a uniform mark of 3.5/4 or 87.5% is awarded for all attempts.**

The main continuous assessment assignment will be worth 21% of the total module mark and will, accordingly, be assessed in a more detailed way.

| ID No. | Qualification/ Study Period | Team | Mark (Max=4) |
|----------|--------------------------------|------|-----------------|
| 57752482 | CAIS3 | | 0 |
| 56507697 | CAIS3 | | 0 |
| 59104554 | ECSAX | 1 | 3.5 |
