

# CA597 Assignment

## Table of contents

1 Assignment Projects.....	2
2 Marking Scheme - Projects which followed rules.....	3
3 Marking Scheme - Projects which had sections of report taken from web sites without any form of referencing.....	3
4 Marking Scheme - Projects which had code taken from web sites incorrectly referenced.....	3

## 1. Assignment Projects

The results for the continuous assessment are below. At the end of the page there are three marking schemes. If your team followed the project rules you got marked out of the first scheme. Groups which broke the rules got marked out of one of the two subsequent schemes.

Thanks for all the effort put in, and congratulations to Mag.Net for winning the best project award. The prize is 90% :)

If you did poorly on the project don't worry it's only worth 35%, you have plenty of scope to make up marks in the written exam.

Average score - 52.72%

Best Project - Mag.Net 90%

\*indicates that some members of the group got less marks for not showing up or working on the project.

Book-A-Marina	88%
LuxoCar.com	31%
Sparks.ie	50%
